For Modification of the Television Market of	)	
Station WFBD, Channel 48, Destin, Florida	)	

TO: Chief, Media Bureau

**PETITION FOR SPECIAL RELIEF**

Comcast Cable Communications, LLC, on behalf of its subsidiaries and affiliates (hereinafter "Petitioner" or "Comcast"), pursuant to Section 614(h)(1)(C) of the Communications Act and Sections 76.7 and 76.59 of the Commission's rules, hereby requests that the television market of WFBD (Channel 48, Destin, Florida) ("WFBD" or "Station") be modified to exclude certain communities served by Petitioner that are located in the Mobile-Pensacola DMA (the "Cable Communities").<sup>1</sup> Although the Mobile-Pensacola DMA encompasses WFBD's city of license, Destin, Florida, affording WFBD "must carry" status on Petitioner's systems serving the

---

<sup>1</sup> The Cable Communities include the Alabama communities of Chickasaw, Mobile, Prichard, Saraland, Dauphin Island, and immediately surrounding areas of unincorporated Mobile County. A list of the Cable Communities is attached hereto as Exhibit 1. The location of the Cable Communities and WFBD's city of license, Destin, Florida is shown on maps obtained from the *Rand McNally Road Atlas (2012 Edition)* and attached hereto as Exhibit 2. The location of the Cable Communities and Destin, Florida are also shown on the Longley-Rice map included in Exhibit 3 hereto.

Cable Communities would be at odds with the goals underlying Section 614 of the Communications Act, and the Commission's rules adopted pursuant thereto.<sup>2</sup>

Petitioner's request falls squarely within Section 614's market modification provisions, which allow the Commission to "exclude communities from [a] station's television market to better effectuate the purposes of this section."<sup>3</sup>

In considering such requests, the Communications Act requires that the Commission review the following factors:

- (I) whether the station or other stations located in the same area, have been historically carried on the cable system or systems within such community;
- (II) whether the television station provides coverage or other local service to such community;
- (III) whether any other television station that is eligible to be carried by a cable system in such community in fulfillment of the requirements of this section provides news coverage of issues of concern to such community or provides carriage or coverage of sporting and other events of interest to the community; and
- (IV) evidence of viewing patterns in cable and noncable households within the areas served by the cable system or systems in such community.<sup>4</sup>

Although WFBD technically is in the same DMA market as the Cable Communities, WFBD does not actually *serve* the Cable Communities, which are on average approximately 100

---

<sup>2</sup> On April 2, 2012, the Station filed a complaint for mandatory carriage of WFBD's signal on Comcast's systems serving the Cable Communities. *See* FCC Docket CSR-8608-M. Comcast is filing an opposition in that proceeding referencing this Petition, simultaneously herewith.

<sup>3</sup> 47 U.S.C. § 534(h)(1)(C).

<sup>4</sup> *Id.*

miles from WFBD's city of license, Destin, Florida.<sup>5</sup> Further, WFBD does not provide digital service contour coverage to the Cable Communities, or an off-air signal of adequate quality to individual households in the subject communities.<sup>6</sup> The Commission has observed that "the broadcast signal carriage rules were not intended to transform an otherwise local station into a regional 'super station' that must be automatically carried in every single community in an ADI."<sup>7</sup> Affording must carry status to WFBD, which has no true local nexus with the Cable Communities, would disserve Petitioner's subscribers by limiting Petitioner's flexibility to provide the programming and services that its customers prefer. Such a result clearly would be contrary to the purpose of the must carry statute and rules.

A review of these factors demonstrates that WFBD should not be afforded "must carry" status in the Cable Communities. As explained below, WFBD has not "been historically carried" on the systems serving the Cable Communities; WFBD does not provide coverage or other local service to the Cable Communities; other broadcast stations currently carried by the systems at issue provide news coverage of local issues, including local sports and other local events; and WFBD has no reported viewership in either cable or non-cable households in Mobile County where the Cable Communities are located.

Indeed, the circumstances in this case are even more compelling than those the Commission has already found to justify the modification of broadcast station WPAN's (Fort

---

<sup>5</sup> The distances from Destin, Florida to each of the respective Cable Communities were obtained from <http://www.indo.com/distance> and are attached hereto as Exhibit 4.

<sup>6</sup> See Exhibit 3. Signal strength measurements taken at the relevant principal headends are attached hereto as Exhibit 5.

<sup>7</sup> *Time Warner Entertainment-Advance/Newhouse Partnership*, 11 FCC Rcd. 6541, ¶ 25 (1996).

Walton Beach, Florida) television market to exclude the very same cable communities.<sup>8</sup> In *Comcast-WPAN*, as in this case, the station lacked historical carriage, signal coverage, local programming and viewership, but was located even closer to the Cable Communities than is WFBD in this case. Accordingly, Comcast requests that the Commission modify WFBD's "must carry" market to exclude the Cable Communities.

**A. WFBD Has Not "Been Historically Carried on the Cable System[s]" Serving the Cable Communities.**

WFBD has never been carried in the Cable Communities, despite the nearly 7 years it has been in operation.<sup>9</sup> Congress sought information with respect to historic carriage as support for modifying a particular market in an effort to avoid disruption of established viewing patterns and to ensure that stations do not lose access to existing audiences as a result of the new rules.<sup>10</sup> Because WFBD has never been carried on the systems serving the Cable Communities, is not available off-air in the Cable Communities, and has no local ratings, the exclusion of the communities from the Station's television market would be consistent with Congressional intent, *i.e.*, there would be no disruption to established viewing patterns and the requested action would not deprive the Station of any existing cable audience. In this case, WFBD's lack of historic cable carriage confirms that there is no nexus between WFBD and the Cable Communities.

---

<sup>8</sup> See *Comcast Cable Communications, LLC*, 20 FCC Rcd. 10093, ¶ 7 (2005) ("*Comcast – WPAN*").

<sup>9</sup> Channel line-ups for the Cable Communities are attached hereto as Exhibit 6. According to the *Television and Cable Factbook* (2012 Edition), the Station began operation in 2005. See Exhibit 7. The FCC's database indicates that the Station was initially licensed nearly 10 years ago, in 2002. See *id.*

<sup>10</sup> See H.R. REP. NO. 102-628, at 97 (1992).

**B. WFBD Does Not “Provide[] Coverage or Other Local Service” to the Cable Communities.**

The Commission has stated that for purposes of a market modification petition, an analog station’s local coverage area “may be demonstrated by the presence of a predicted Grade B contour, or by proximity to the community or communities in question.”<sup>11</sup> Since the digital transition on June 12, 2009, the Commission has accepted a digital station’s “noise-limited” service contour as the functional equivalent of an analog station’s Grade B contour.<sup>12</sup> As shown in Exhibit 3, the Longley-Rice digital signal coverage map demonstrates that the Cable Communities are located beyond WFBD’s 41 dBu<sup>13</sup> service area contour reach.<sup>14</sup> The attached signal strength studies taken at the principal headends serving the Cable Communities also demonstrate that WFBD does not provide an actual off-air signal of adequate strength.<sup>15</sup> Given WFBD’s lack of contour coverage and its failure to deliver a signal of sufficient strength to the respective Cable Communities’ system headends, it is reasonable to conclude that WFBD does not deliver a good quality off-air signal to individual *households* in the Cable Communities and,

---

<sup>11</sup> *Montgomery Cablevision, L.P. d/b/a Cable TV Montgomery*, 10 FCC Rcd. 2732, ¶ 19 (1995) (citing MM Docket 92-259, 8 FCC Rcd. 2965, 2977 (1993)). See also 47 C.F.R. § 76.59(b)(2).

<sup>12</sup> See, e.g., *Tennessee Broadcasting Partners For Modification of the Television Market for WBBJ-TV, Jackson, Tennessee*, 25 FCC Rcd. 4857, ¶ 6 (2010); *Commonwealth Broadcasting Group, Inc.*, 25 FCC Rcd. 213, ¶ 7 (2010).

<sup>13</sup> Pursuant to 47 C.F.R. § 73.622(e)(1), the noise-limited service contour for WFBD (Channel 48) is 41 dBu.

<sup>14</sup> The Commission has held: “[T]he Longley-Rice model provides a more accurate representation of a station’s technical coverage area because it takes into account such factors as mountains and valleys that are not specifically reflected in a traditional . . . contour analysis.” *Definition of Markets for Purposes of the Cable Television Broadcast Signal Coverage Rules*, 14 FCC Rcd. 8366, ¶ 50 (1999).

<sup>15</sup> See Exhibit 5.

therefore, does not “provide[] coverage” within those communities.<sup>16</sup> The signal strength studies combined with the Longley-Rice map demonstrate that the communities at issue are beyond WFBD’s actual market reach.<sup>17</sup>

The lack of signal coverage could be reasonably anticipated, as the average distance between WFBD’s city of license (Destin, Florida) and the Cable Communities is approximately 100 miles. The distances from Destin to the Alabama communities of Chickasaw, Dauphin Island, Mobile, Prichard, and Saraland are 99 miles, 102 miles, 98 miles, 102 miles and 101 miles, respectively.<sup>18</sup> These distances are similar to or exceed those found to justify market modification requests in numerous orders issued by the Commission.<sup>19</sup> Indeed, as noted above, the Commission previously granted the Company’s request to exclude the same communities at issue in this case from the television market of WPAN, which is licensed to Fort Walton Beach, Florida - even closer to the Cable Communities.<sup>20</sup>

The lack of nexus between WFBD and the Cable Communities is also demonstrated by the fact that the driving distances and times between Destin and the Cable Communities are substantial. For example, it is approximately 141 miles driving distance from Destin to the

---

<sup>16</sup> 47 U.S.C. § 534(h)(1)(C)(ii)(II).

<sup>17</sup> These findings are buttressed by the signal coverage map available from the FCC’s website and attached hereto as Exhibit 8, which further illustrates that WFBD’s signal fails to reach the Cable Communities.

<sup>18</sup> See Exhibit 4.

<sup>19</sup> See, e.g., *Greater Worcester Cablevision, Inc.*, 13 FCC Rcd. 22220, ¶ 8 (1998) (39 to 70 miles); *Greater Worcester Cablevision, Inc.*, 12 FCC Rcd. 17347, ¶ 21 (1997) (38 to 61 miles); *Time Warner Cable*, DA 97-1009, 12 FCC Rcd. 23249, ¶ 15 (1997) (42 to 58 miles); *Time Warner Cable*, 11 FCC Rcd. 13149, ¶ 13 (1996) (45 miles); and *Cablevision of Cleveland, L.P. and V Cable, Inc. d/b/a Cablevision of Ohio*, 11 FCC Rcd. 18034, ¶ 13 (1996) (41 miles).

<sup>20</sup> See *Comcast – WPAN*, ¶ 7. In that case, the Commission found Fort Walton Beach to be an average distance of approximately 92 miles from the Mobile County communities at issue.

southernmost Cable Community of Dauphin Island, Alabama, which takes an estimated 2 hours and 35 minutes of driving time; and approximately 115 miles driving distance from Destin to the northernmost Cable Community of Saraland, Alabama, which takes an estimated 2 hours and 3 minutes of driving time.<sup>21</sup>

Additionally, recent U.S. Census workforce data show that a *de minimis* number of residents from the Cable Communities work in WFBD's city of license, Destin, Florida, further weakening any nexus between WFBD and the Cable Communities.<sup>22</sup> For example, the reported 9 people from Mobile that work in Destin represent just 0.006 percent of the total 148,010 "18 and older" population figure reported by the 2010 Census for Mobile.<sup>23</sup>

In addition to WFBD's significant distance from, and inability to provide an adequate off-air signal to the Cable Communities, the Station does not appear to provide any significant "local programming" to the communities at issue. Comcast was unable to locate any evidence of WFBD's programming in the television guide found in *The Mobile Register* available to residents of the Cable Communities.<sup>24</sup> Although Comcast was unable to find a website for

---

<sup>21</sup> The driving distances and estimated driving times between the locations were obtained from <http://www.maps.google.com> and are attached hereto as Exhibit 9. WFBD's situation is consistent with the "hub and spoke" model described by the U.S. Court of Appeals for the Second Circuit, in which viewers may tune in to stations located in a central metropolitan region (the "hub"), whereas outlying communities ("the spokes") generally feature programming that focuses on those communities in closer proximity to the station. *See WLNY-TV, Inc. v. FCC*, 163 F.3d 137 (2d Cir. 1998). Here, WFBD is located in the eastern reaches of the Mobile market and can, at most, be described as a "spoke" with regard to the central "hub" of Mobile, Alabama. Thus, while some Destin, Florida residents may look to the Mobile, Alabama television market for programming, Mobile-area residents, such as those in the Cable Communities, do *not* look to Destin.

<sup>22</sup> U.S. Census workforce data was obtained from <http://onthemap.ces.census.gov>, relevant portions of which are attached hereto as Exhibit 10.

<sup>23</sup> *See id.* 2010 Census data for Mobile, AL was obtained from [www.factfinder.census.gov](http://www.factfinder.census.gov) and is attached hereto as Exhibit 11.

<sup>24</sup> An excerpt from *The Mobile Register* is attached hereto as Exhibit 12.

WFBD, which might include the Station's programming schedule, the Station is listed in the *Pensacola News Journal* as affiliated with Blab TV.<sup>25</sup> The *Pensacola News Journal* and the programming schedule found at [www.blabtv.com](http://www.blabtv.com) show that the WFBD's weekly schedule consists primarily of paid programming, with no particular nexus to any of the Cable Communities.<sup>26</sup>

WFBD's failure to provide signal coverage, its geographic separation, and its lack of local programming in this case weigh heavily in favor of Petitioner's request. It is clear that WFBD does not provide "coverage or other local service" to the Cable Communities.

**C. Other Television Stations Carried by the Cable Systems Serving the Cable Communities Provide News Coverage of Issues of Concern and Coverage of Sporting and Other Events of Interest to the Cable Communities.**

The Commission has stated that "[w]here a cable operator is seeking to delete a station's mandatory carriage rights in certain communities within its [market], and it is clear that the station is not providing a local service to those communities, the issue of local carriage of other stations becomes a factor which we will give greater weight than in cases where a party is seeking to add communities."<sup>27</sup> The systems serving the Cable Communities currently carry several truly local stations, which provide coverage of local news and sporting events and that deliver digital contour coverage or an actual off-air signal to the Cable Communities.<sup>28</sup> Indeed, the cable systems at issue carry numerous broadcast stations licensed to the communities of

---

<sup>25</sup> Excerpts from the *Pensacola News Journal* television listings are attached hereto as Exhibit 13.

<sup>26</sup> See *id.* See also the "Program Schedule" obtained from [www.blabtv.com](http://www.blabtv.com) attached hereto as Exhibit 14.

<sup>27</sup> *Rifkin/Narragansett South Florida, CATV Limited Partnership, d/b/a Gold Coast Cablevision*, 11 FCC Rcd. 21090, ¶ 27 (1996).

<sup>28</sup> See Exhibit 6. See also Exhibit 15.

Mobile and Pensacola, including multicast signals (many in multiple formats), many of which provide extensive coverage of local news and sporting events.<sup>29</sup> For example, the systems at issue carry stations licensed to Mobile, Alabama including WKRG (CBS), which airs local newscasts Monday through Friday at 5:00 a.m. - 7:00 a.m., 12:00 p.m., 5:00 p.m., 6:00 p.m., and 10:00 p.m.; WPMI (NBC), which airs local newscasts Monday through Friday at 5:00 a.m. - 7:00 a.m., 12:00 p.m., 5:00 p.m., 6:00 p.m., and 10:00 p.m.; and WALA (FOX), which airs local newscasts Monday through Friday at 5:00 a.m. - 8:00 a.m., 4:00 p.m. - 6:00 p.m., and 9:00 p.m.<sup>30</sup>

Even if WFBD were to provide significant or unique programming specifically targeting the Cable Communities, which it does not, the coverage provided by other, truly *local* stations would undermine any special benefits associated with WFBD.

**D. WFBD Has No Reported Viewership in the Cable Communities.**

The fourth statutory factor requires that the Commission consider audience viewing patterns in both cable and non-cable households. Because WFBD is unable to deliver an off-air signal or provide a 41 dBu service contour to the Cable Communities, it is not surprising that the Station has no reported viewership in those communities. Indeed, the Nielsen 2011 *County/Coverage Survey* data attached hereto as Exhibit 16, do not report any ratings whatsoever for WFBD in either cable or non-cable households in Mobile County where the Cable Communities are located. Thus, this factor also weighs in Petitioner's favor.

---

<sup>29</sup> See Exhibit 6.

<sup>30</sup> The relevant programming schedules were obtained from [www.tvguide.com/listings](http://www.tvguide.com/listings) and are attached hereto as Exhibit 15.

## CONCLUSION

Based on all of the criteria established by Congress and the Commission for determining whether a market modification is justified, WFBD's must carry market should be modified to make it congruous with market realities. Accordingly, for the reasons stated herein, Petitioner hereby requests that the Commission modify WFBD's "must carry" market to exclude the Cable Communities.

## **EXHIBIT 5**

### Must-Carry Signal Strength and Quality Tests

According to the FCC, signal strength surveys should, at a minimum, include the following:

- 1) specific make and model numbers of the equipment used, as well as its age and most recent date(s) of calibration;
- 2) description(s) of the characteristics of the equipment used, such as antenna ranges and radiation patterns;
- 3) height of the antenna above ground level and whether the antenna was properly oriented; and
- 4) weather conditions and time of day when the tests were made."

Generally, the signal being tested should be treated similarly to other currently-received signals in the same band (same antenna height, etc.). The initial point of measurement should be at the input to the first piece of active processing equipment (*before preamp*) relevant to the signal at issue. To convert dBmV to dBm, subtract 48.75 dB from the dBmV value.

**For a digital station:** a good quality digital television signal at a cable system's principal headend is -61 dBm (-12.25 dBmV). Consistent with analog signal testing procedures, if the initial test results are less than -67 dBm (-18.25 dBmV), at least four readings must be taken over a two-hour period. Where the initial readings are between -67 dBm (-18.25 dBmV) and -61 dBm (-12.25 dBmV), inclusive, at least six readings should be taken over a 24-hour period with measurements not more than four hours apart.

Headend Name and State/Test Location Comcast Mobile AL 3257 Moffett Rd 36607

Station Tested: Call Sign WFBD Channel 48 Video Carrier Frequency 677 Mhz

City and State of License Mobile AL

		--Signal level--		Signal/Picture Quality Problems	Weather Conditions
Date	Time	dBmV	dBm		
12/22/11	7:00am	-32.5	-81.2	No Signal Lock	Fog 66deg
12/22/11	7:46am	-33.0	-81.7	No Signal Lock	Cloudy 66deg
12/22/11	8:15am	-31.3	-81.1	No Signal Lock	Cloudy 67deg
12/22/11	9:00am	-31.7	-81.5	No Signal Lock	Cloudy 69deg

**Equipment Used for Testing:** List the antenna, preamp, downconverter, downlead, etc. used to perform the tests. Indicated if the antenna is cut to a particular channel or frequency. Indicate the height of the antenna during the test, and the length and type of downlead. Indicate the output frequency or channel of the downconverter.

### BTY-5LB BTY-10-HB BTY-5-FM

BTY series single channel 5 and 10 element antennas are high quality, professional VHF/FM antennas for channels 2 thru 6, FM and 7 thru 13. NOTE: (BTY-FM antenna has two driven dipoles for a total of six elements.) They are designed with a two piece boom permitting the antennas to be shipped via UPS to reduce freight and handling costs. BTY VHF antennas feature high gain and a narrow beamwidth at the individual channel. Two piece, square boom construction and end-sealed aluminum elements provide added strength, excellent wind resistance and exceptional weathering properties. The heavy duty mounting bracket is positioned at the antenna's center of gravity for balanced mounting to the mast. The antenna can be rear mounted by using a BT Model #5760 Canilever Mount. This permits attachment to vertical or horizontal tower members. BTY Series antennas feed 75 ohm coaxial cable down leads.

### BTY-10-U

Blonder Tongue BTY-10-U Series single channel, 10 element antennas are high-quality professional UHF antennas. They are available for Channels 14 thru 69. BTY antennas feature high gain and a narrow beamwidth at the individual channel. Single piece, square boom construction and 3/8" x 0.049" aluminum elements provide added strength, excellent wind resistance, and exceptional weathering properties.

The heavy duty mounting bracket, positioned at the rear, allows the antenna to be mounted directly to vertical tower members. This feature maximizes signal reception qualities of the antenna by keeping elements clear of support structures. It also eliminates the need for outriggers and masts.

BTY Series antennas feed 75 Ohm coaxial cable downloads. A male type F connector is required to mate with the female output connector.

#### SPECIFICATIONS

Description Technical Specifications

The Channel Master CM 3020 is an outdoor TV antenna that is designed for deep fringe reception areas and will allow you to receive UHF, VHF, FM and HD signals. This antenna has a signal range of up to 100 miles and will pick up available local channels 2 thru 69. With an HD television you will pick up any crystal clear HD signals being broadcast in your area.

- Reception Range: Channels 2 thru 69 up to 100 miles
- Picks up UHF, VHF, FM and HD
- Antenna Size: 152 x 95 x 22 in
- Superior signal strength in weak signal locations
- Easy Installation
- For maximum performance, a Channel Master preamplifier should be used with this antenna

Coaxial Cable sold separately  
Antenna Mounts and Masts sold separately

Canada, a gray wolf pup must heed lessons if it is to grow large enough to winter on "Frozen Planet," premiering on Discovery. JEFF TURNER/BBC/Discovery

## ry thrills, chills Frozen Planet'

whales making killer waves to wash seals off ice floes, considered to be the most complex team hunt ever filmed.

"Our stories range from things that we're familiar with to what we think are a very, very important part of the filming of 'Frozen Planet,'" said director and cameraman Chadden Hunter. "One of the joyous things for us in filming this is that you do come across stories which not only have you not gone out planning to film, but you never even heard of. And so a few of the real special stories for us, like the orcas wave-washing the seals off, was

something that scientists had talked about, but often you're going on scientist anecdotes. And, you know, actually getting the footage of those stories is the real challenge."

Combined, the team filmed in every nation inside the Arctic and Antarctic circles during a record 2,356 days in the field, one and a half years at sea, more than 66 months on the sea ice and 134 hours beneath that ice filming in the polar oceans.

The monumental effort resulted in the most extensive aerial filming of the Greenland ice sheet and Antarctica, retracing the steps of such early explorers as Robert F. Scott and Roald Amundsen.

Among those numbers are such natural wonders as a caterpillar with a sort of organic antifreeze in its veins, although just as curious is the behavior of some species. For example, the courtship of polar bears is surprisingly tender but equally brutal, as the male must fight off numerous rivals during its weeks of duration.

Speaking of stamina, the albatross can stay aloft with its 11-foot wingspan for five whole years before setting foot on land again. Impressive, yes, but perhaps the most spectacular phenomenon recorded by the filmmakers was astonishingly rapid and destructive yet completely lifeless.

"We actually managed to get some footage of a glacier which we call 'the glacier of death,'" says producer Vanessa Fitz. "It's an ice that grows down room of sea ice and seabed and kills it in its path."

"It's growing a stalactite in a over a few hours added. "It's incredible. But what that is frozen in the sea and the starfish, they can wait it might melt with rents and they can but that ice trails es moves quicker creatures, like it and just traps them it's one of these which blew our minds the scientists' nobody even saw."

Of course, now polar areas are at most threatened change, and the address that issue ning visual evidence thoughtful conclusion.

"I think we were motivated as a team to create this kind of portrait of the polar because I think we're aware that there's change going on, said. "In some ways, that this series is a chance to see the most spectacular phenomenon recorded by the filmmakers was astonishingly rapid and destructive yet completely lifeless."

e been a variety  
nd the show

always ended with the two of them singing a song called "Two of a Kind," I think. Please tell me the name of the show. I'm pretty sure it was a summer fill-in, and one of the stars may have been Dudley Moore.

**A**: "Piccadilly Palace" was the summer replacement series for ABC's "Hollywood Palace," and the co-hosts were Millicent Martin and the comedy team of Eric Morecambe and Ernie Wise, who had several long-running shows on British TV. Guest stars on "Piccadilly Palace" included Dudley Moore, Tom Jones, the Kinks, the Moody Blues, and the Dave Clark Five.

**Q:** What has happened to "CSI: NY"? There are only four shows I watch on TV, and that was one. Why is it shows are removed without notifying the viewing
